Republicans in Congress want to repeal the Affordable Care Act on day one of the new administration, but refuse to come up with a plan to replace it. A new study from the Urban Institute confirms that this will be a slow-motion disaster waiting to happen and will cause a health care crisis in America.

Without a replacement, 30 million Americans will lose their insurance. Millions of families and children that rely on Medicaid will lose their lifelines. The number of uninsured children will more than double. Seniors could see their Medicaid drug prices skyrocket. People with preexisting conditions—folks with cancer, asthma, or diabetes—would be at the mercy of insurance companies once again and denied coverage. Hospitals and physicians are already saying that repealing the Affordable Care Act will make their jobs—saving lives—harder.

Tell your member of Congress that repealing the Affordable Care Act is simply unacceptable. We deserve a plan, not empty promises.
