

Message Box

Value:

We must make sure that seniors get the long-term care they need, people with disabilities get assistance to live independently, and that children can see a doctor when they get sick.

Vision:

We can have sustainable Medicaid and Medicare programs that care for our most vulnerable citizens.

Barrier:

Reducing the deficit and ensuring the sustainability of these programs is important, but current proposals to cut Medicaid and Medicare lead to the same result: gutting essential programs and jeopardizing the health and economic security of Americans.

Ask:

We need you to support changes that reflect our nation's priorities by enacting smart, humane cost containment strategies that won't harm seniors, people with disabilities and children.
